

**May 19, 2005**

**To Whom It May Concern**

**Schuss Clark, an Architectural Corporation, worked with David de Bie on a very difficult remodel/addition to a rather complex structure in the Old Town Area of San Diego. This project was a 2-story office building over one level of parking. We were required to not only remodel and enlarge the building but also bring the facility up to the current building codes, including safety and structural issues, as well as meeting all disabled access requirements.**

**By its nature, remodeling of existing buildings always produces unexpected surprises and requires a general contractor that can be cost effective with creative solutions. He was very cooperative and professional when working with us to meet those challenges in a most honest and professional manner. It was not only a pleasure working with Mr. de Bie, I look forward to repeating the experience.**

**If you are looking for an honest, intelligent general contractor, I highly recommend Mr. David de Bie. Please feel free to call me regarding this recommendation.**

**Sincerely,**

**Howard J. Schuss, AIA  
President**
